Thermo Fisher Scientific Announces New General Purpose Centrifuge System

New Thermo Scientific Heraeus Multifuge 3 Plus centrifuge offers industry-leading capacity and speed to accelerate sample preparation processes

MILFORD, MA. – Thermo Fisher Scientific Inc., the world leader in serving science, has introduced the Thermo Scientific Heraeus® Multifuge® 3 Plus Centrifuge Series – a fully integrated, high-throughput system that includes a broad range of high-capacity, high performance rotors and adapters for both clinical and research applications. With the addition of four new high performance fixed-angle carbon fiber rotors and new high-capacity adapters in this release, the Thermo Scientific Heraeus Multifuge 3 Plus Centrifuge Series brings higher speed and capacity to the laboratory bench, improving the researchers' everyday sample preparation processes.

The Thermo Scientific Heraeus Multifuge 3 Plus is a versatile 3-liter centrifuge that offers researchers the highest bench-top processing capabilities in the market. The strong yet lightweight properties of the carbon fiber rotors allow for unprecedented g-forces – delivering super speed centrifugation in a bench-top centrifuge: 14 x 50 ml conical tubes; 8 x 50 ml conical tubes at over 24000 x g; 6 x 250 ml bottles at 18500 x g, 48 x 1.5/2 ml at over 24000 x g, and 28 x 50 ml conical tubes in the swinging bucket rotor in sealed conditions. For blood tube processing, the Heraeus Multifuge 3 Plus offers new adapters that deliver industry-leading capacity: 108 x 5 or 7 ml blood collection tubes and 84 x 10 ml blood collection tubes. The combination of capacity and processing power in the new Heraeus Multifuge 3 Plus means that researchers can spin more samples in less time, which in turn frees them to focus on their results.

With its broad selection of nine swinging-bucket rotor configurations and seven fixed-angle rotors, the Thermo Scientific Heraeus Multifuge 3 Plus offers unsurpassed versatility, making it a truly cost-effective investment for every lab. Together with the low-profile design, a soft-touch waterproof keypad, SMARTspin™ Imbalance Detection System, and numerous other safety and convenience features, the Heraeus Multifuge 3 Plus Centrifuge Series continues to set the industry standard for reliability and convenience. For more information, please visit www.thermo.com/centrifuge.

About Thermo Fisher Scientific

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, enabling our customers to make the world healthier, cleaner and safer. With annual revenues of \$10 billion, we have more than 30,000 employees and serve over 350,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings. Serving customers through two premier brands, Thermo Scientific and Fisher Scientific, we help solve analytical challenges from routine testing to complex research and discovery. Thermo Scientific offers customers a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory equipment, chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
