Thermo Fisher Scientific Launches Nanoliter Dispensing Pipette Tips

Thermo Scientific PocketTips are cost and time efficient, delivering excellent consistency and pipetting precision

HUDSON, NH., – Thermo Fisher Scientific Inc., the world leader in serving science, has introduced a new line of Thermo Scientific PocketTips®, enabling nanoliter volume dispensing on current laboratory automated systems. An internally molded capillary pocket allows transfer of 50-500 nL molecular compounds suspended in Dimethyl Sulfoxide (DMSO) directly to assay plates, saving time, reagent and labware, and improving data quality with in-tip mixing.

PocketTips are made from high-quality polypropylene that eliminates adherence and maximizes the recovery of all fluids. Through aspiration, the capillary pocket fills with the specified amount of compound solution and facilitates soft in-tip mixing of sample and assay material. By removing timely intermediate dilution steps, this innovative pipetting method makes it possible to perform assays quicker, reduces reagent costs by conserving valuable compounds and prevents compound precipitation for more accurate and precise results. Thermo Scientific PocketTips are ideal for all secondary compound screening applications, such as selectivity assays (P450), potency determinations (IC50), cell- and enzyme-based assays and PCR primer dilutions.

For more information about Thermo Scientific PocketTips, please visit www.thermo.com/matrix

Thermo Scientific is part of Thermo Fisher Scientific, the world leader in serving science.

About Thermo Fisher Scientific

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, enabling our customers to make the world healthier, cleaner and safer. With annual revenues of \$10 billion, we have more than 30,000 employees and serve over 350,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings. Serving customers through two premier brands, Thermo Scientific and Fisher Scientific, we help solve analytical challenges from routine testing to complex research and discovery. Thermo Scientific offers customers a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory equipment, chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
