## **Capp PipetFast™ System**

### **Microarray pipetting now fast - precise - convenient**

As a world first, Capp's new PipetFast System makes it possible to pipette quickly with high precision onto Microarray Slides and 384 Maldi TOF plates without the expensive of dedicated automated equipment.

Following on from the recent release of the CappAero™ 64 & 48 Channel MultiPipettes, this latest offering from Capp will allow users to easily and confidently pipette onto Microarray slides, 384 Maldi TOF plates and a range of 384 & 1536 microplates and -modules.

The CappFast System can easily be adjusted in all axis, and to facilitate high precision pipetting, Capp additionally offers a special SBS (microplate) foot-print SlideHolder, for accommodating up to four Microarray Slides. Capp also offers a range of high quality pipette tips to complement our system.
