Thermo Scientific MaxQ Shakers collection

HUDSON, NH. – With a broad selection of models, the Thermo Scientific MaxQ™ orbital shaker range provides flexible and versatile solutions that can be depended upon by researchers. There is a shaker that covers every application, from the compact footprints of the MaxQ 2000 and 3000 series open air platform shakers, the MaxQ 4000 series bench top shakers and the MaxQ 7000 series water bath shakers, to the larger MaxQ 5000 series floor shakers and the MaxQ 6000 series stackable shakers. Available as incubated or refrigerated models, with either analog or digital operating systems, MaxQ shakers are ideal for all protein and molecular biology methods. These include cell culture, protein purification, protein expression studies, solubility studies, and general mixing and washing procedures.

Built to the highest standards for long-term durability, Thermo Scientific MaxQ shakers incorporate the most advanced and fully-tested technologies to provide reliable operating platforms. Powered by a triple-eccentric drive to handle heavy workloads, each shaker provides uniform agitation and enables continuous 24-hour operation, even at high speeds. Chamber temperatures can be monitored and controlled within $\pm 0.1^\circ\text{C}$ accuracy at 37°C , and units can operate at temperature ranges between 0°C and 80°C . Shakers may feature either a clear lid or door with a large glass-viewing window to allow researchers to observe samples without disturbing the chamber. Temperature, speed and operating time can be viewed simultaneously on individual displays, which help minimize errors in established running conditions.

Thermo Scientific is part of Thermo Fisher Scientific, the world leader in serving science.

About Thermo Fisher Scientific

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, enabling our customers to make the world healthier, cleaner and safer. With annual revenues of \$10 billion, we have more than 30,000 employees and serve over 350,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings. Serving customers through two premier brands, Thermo Scientific and Fisher Scientific, we help solve analytical challenges from routine testing to complex research and discovery. Thermo Scientific offers customers a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory equipment,

chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
