

Incorporated in 1989 **Nupore Filtration System**  is a fast growing medium size company of about 40 employees dedicated to research, development & production of Glass Micro Fiber Filters, Micro Porous Membranes, Diagnostic Kit Products & various related products. Fifteen years ago **Nupore** started to develop and produce Membrane Filters for Micro Filtration applications based on certain polymers. Today we offer a wide range of Membranes for fine filtration of liquids as well as Diagnostic applications. Major application areas are R&D in Government and Industrial Laboratories as well as Chemical, Pharmaceutical, Environmental and Food & Beverage analysis.

In addition to our commitment to the Total Quality Management Process and our goal of achieving absolute performance, Nupore maintains certification by United Registrar of Systems Ltd., to **ISO 9001** quality standard.
