

## The No 1 Business to Business Show for the Analytical Industry

There can be no better place to hold an event concerned with an industry of the future than in Dubai...the city of the future.

In January 2009, Dubai plays host once again to the annual showpiece for the global laboratory and instrumentation industry.

ARABLAB provides a unique forum for industry leaders involved in medical, petroleum and environmental research and analysis, laboratory automation and data process management. Regarded by the biotechnology industry as also one of the most important shows serving this growing sector, it is little wonder that the show features very prominently in the marketing plans of the industry.

Commenting on the show Mr David Domoney, Managing Director of the ARABLAB Group said " When I first started this show in 1983, I managed to persuade 41 companies to come to Dubai and demonstrate their products and services at the first ARABLAB...and now 26 years later following a few takeovers and mergers no fewer than 21 of those pioneering companies are still exhibiting...along with 700+ other companies from all over the world".

The show provides a unique showcase for the industry, as it attracts buyers, end-users and distributors from all over the world. Mr David Domoney further commented " Over the years the show has developed a unique reputation to attract buyers from global

markets and not just the Arab world...in fact much business is now done between visitors...sometimes this even amazes me...even at the last show we had buyers from S.America discussing tenders with consultants from Turkey and manufacturers from Australia...Now how is that for global exposure"

DuBiotech (the region's first science and business park dedicated to the global life science industry, where more than fifty companies from around the world are already operating in various biotechnology fields) has confirmed that it will continue its patronage and active support for ARABLAB, as part of its commitment to nurturing the growth of the life sciences industry in the region.

Said Dr Abdulqader Alkhatay, Executive Director of DuBiotech, "We aim to be at the forefront of the life sciences industry by encouraging research and development. Our recent MoU to launch the Gulf Anti-doping and Monitoring Enterprise (GAME), the AED289 million Nucleotide Complex laboratory, and the BioTiqania Training Institute will enable Dubai to evolve as the pioneering destination for biotechnology professionals. Our active involvement in ARABLAB enables us to communicate with all elements of the industry around the world".

At the 2009 show, more national groups than ever before will be participating, including the largest ever from the UK...as well as Germany, Austria, Switzerland, Korea, Spain, India, Taiwan, Singapore and four from China...The show will focus on six main sectors: Biotechnology, Analytical Instrumentation, Laboratory Technology, Environmental Sciences, Measurement & Testing, Robotics & Automation...in addition the packed seminar programme will offer invaluable opportunities to gain information about the latest developments.

Finally commenting on ARABLAB 2009, Mr David Domoney said, " Exhibitions are not only about selling or buying equipment and services...they are also about "networking and understanding more about your industry"...so make a diary note now and arrange to visit Dubai from 10th – 13th January 2009".
